1. THE PROBLEM

The job is changing.
The training isn't.

Malaysian workers are told to reskill. They are not told which skill first, or why this month.

USE VS TRAINING

56%

of Malaysian professionals use AI at work

26% have had formal training

Hays Asia Salary Guide 2025 · via Domain 1 brief

SCALE

620,000

workers projected to be significantly affected

18% of the workforce in the sectors studied

TalentCorp Impact Study 2026

EXPOSURE

28%

of Malaysia's workforce is highly exposed to AI

World Bank & ISIS Malaysia · Sep 2025

Without dated evidence, a worker cannot tell which skills to learn first — and may spend scarce hours on tasks AI is taking over.

Kotak problem statement

2. THE USER

A worry. A phone. Three minutes.

A working adult in Malaysia, in any industry, who wonders what AI means for their job.

Stay strong in my current role

Learn to work with AI here, before the role changes around me.

Move to a role I already have in mind

See the gap, the fit and the shortest credible path.

Show me where I could go

Start with what I can already do, then widen the map.

> They come with a worry and a few minutes, often on a phone. They leave with a plan they can start this week.

Second reader: TalentCorp or HRD Corp

Which rising skills do Malaysian workers lack most? The national view answers with totals only for groups of 10 or more.

3. THE SOLUTION

Open the box.

See what's rising.

Kotak asks 12 yes/no can-do questions, draws a six-corner skills radar, ranks three roles and builds a 12-week plan.

01

Answer 12 can-do questions

About what you have actually done, not what you claim.

02

See the radar and three roles

Each verdict and fit score carries its source and date.

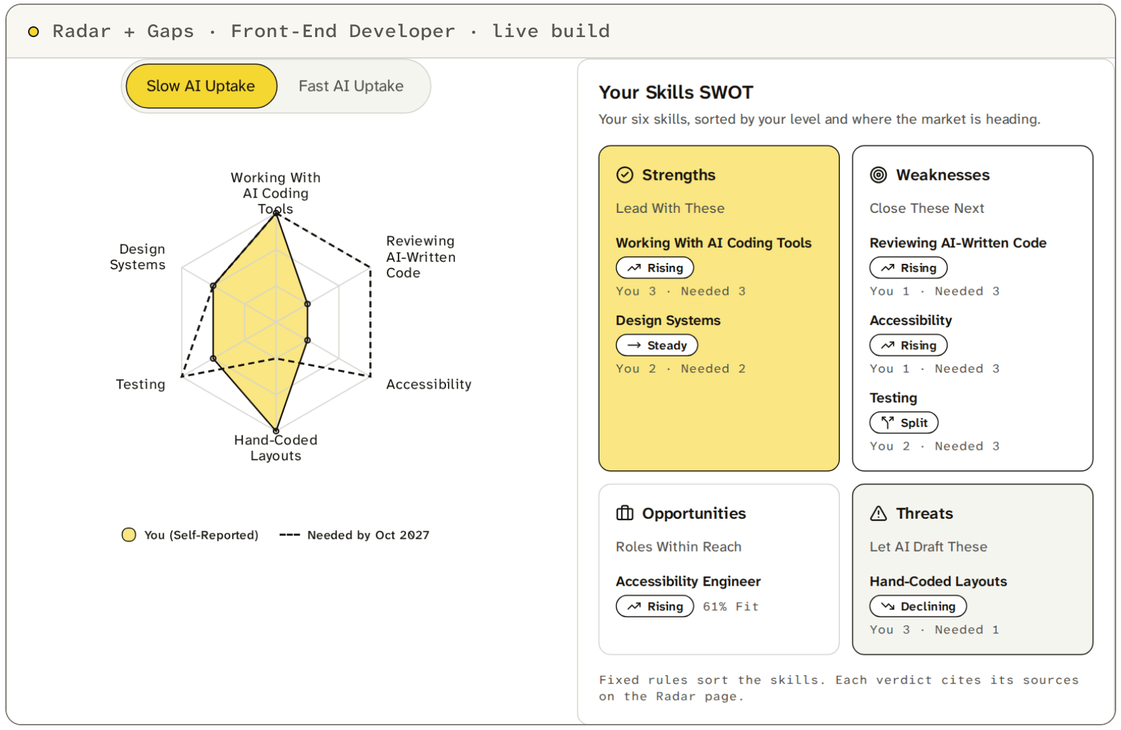

03

Start a dated roadmap

Free steps, time estimates and a finish date. Tick one and the corner rises.

About 3 minutes

Profile	Dated trends	Role match
Roadmap	SDG tags	Uncertainty

4. HOW IT WORKS

Data decides. AI explains.

Every verdict, target, fit score and roadmap order comes from fixed rules over dated snapshots.

01 · SOURCE

Dated snapshots

Anthropic Economic Index Apr/May 2026 · O*NET 30.1 · DOSM · MyCOL

→

02 · RULE

Fixed rules

Levels, targets, verdicts, fit scores and order

→

03 · OUTPUT

Your plan

Radar · three roles · 12-week roadmap

Draft

RunPod groups each job's tasks into six skills and drafts the questions.

Explain

Claude writes two sentences from the cited rows only.

Speak

ElevenLabs voices Kopi; text and mute always available.

The browser recomputes every verdict when the snapshot changes. No model call in the loop.

THE RULE

AI never sets a verdict.

- ✓ It explains the verdict, quoting dated rows.
- ✓ A check rejects any explanation that changes it.
- ✓ If Claude fails, a fixed template answers.

Split and Unknown are valid answers. The app says so instead of guessing.

5. LIVE DEMO

Same job. New month.

The plan moves.

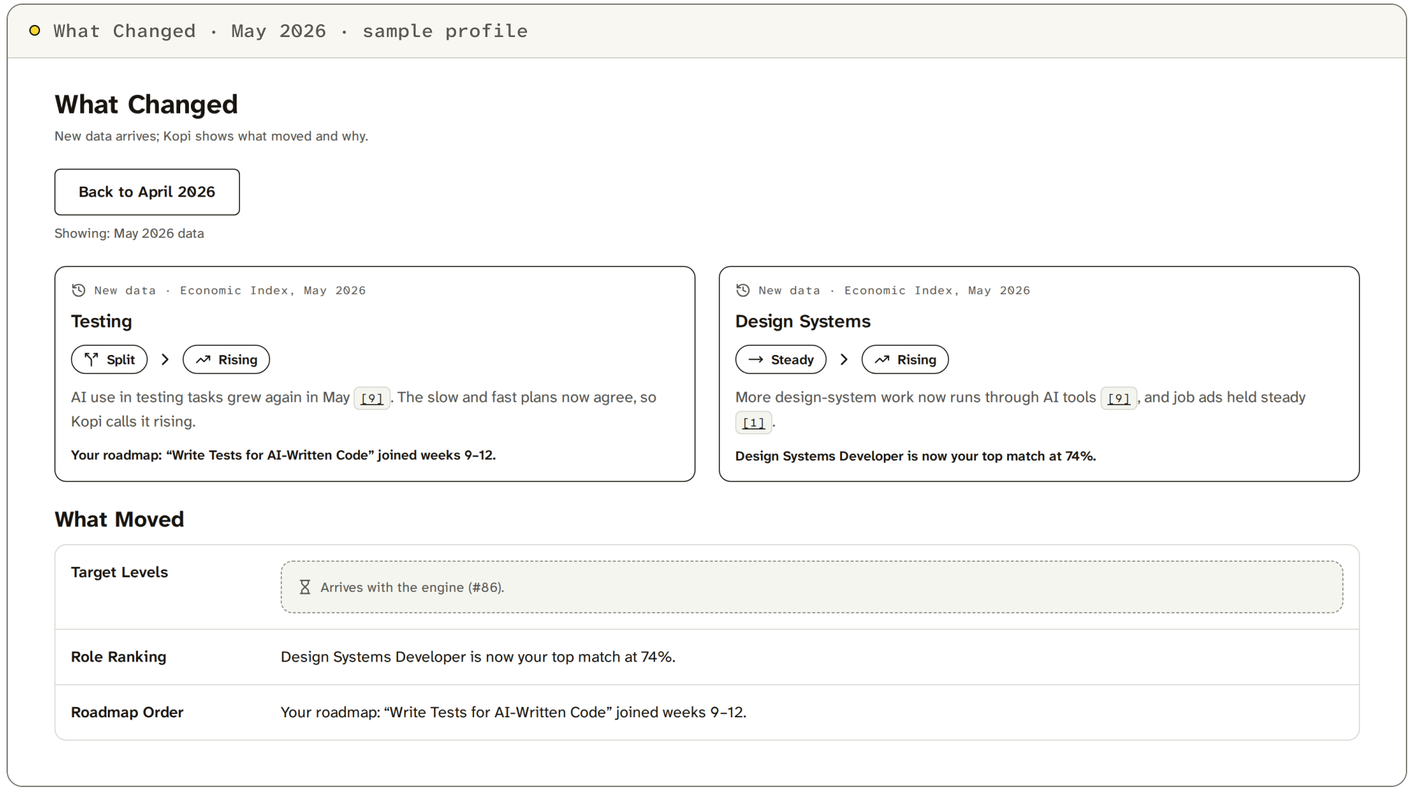

Load the May 2026 snapshot. The browser recomputes the radar, roles and roadmap.

April 2026 → May 2026

Testing	Split → Rising
Design Systems	Steady → Rising
Top match	Design Systems Developer · 74%

Roadmap: “Write Tests for AI-Written Code” joins weeks 9–12.

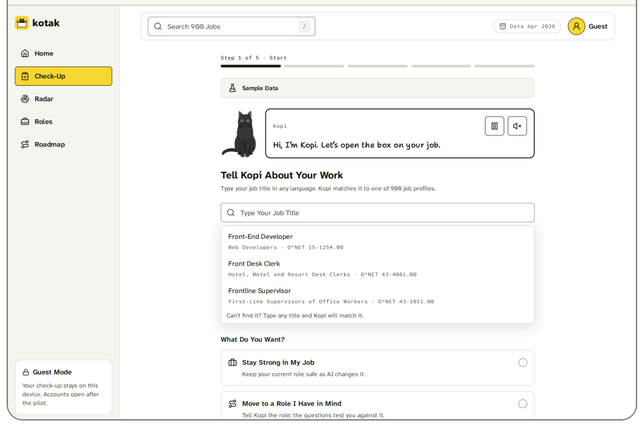

Same profile. Same 12 answers. Only the snapshot changes.

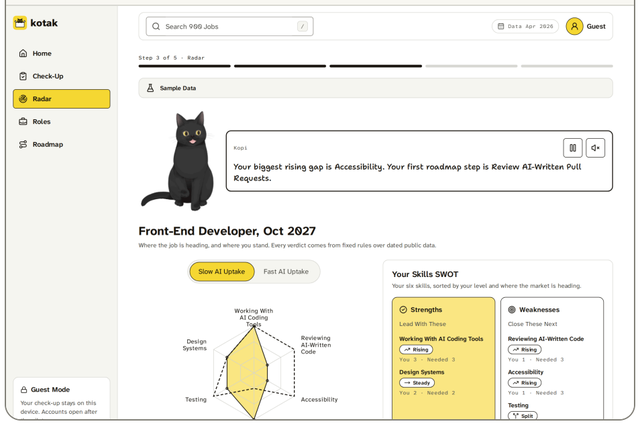

6. THE PROTOTYPE

The whole loop, on screen.

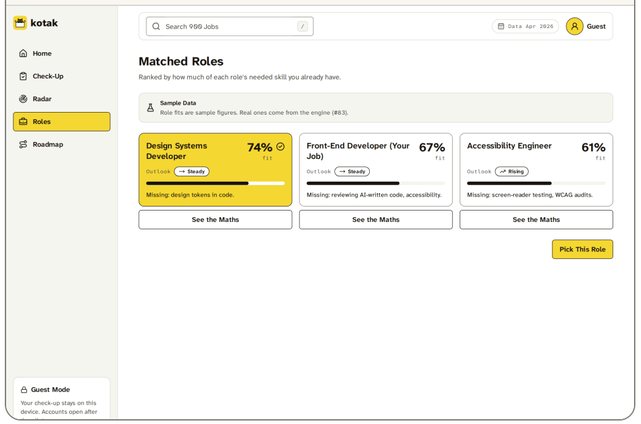

Check-Up · 12 can-do questions

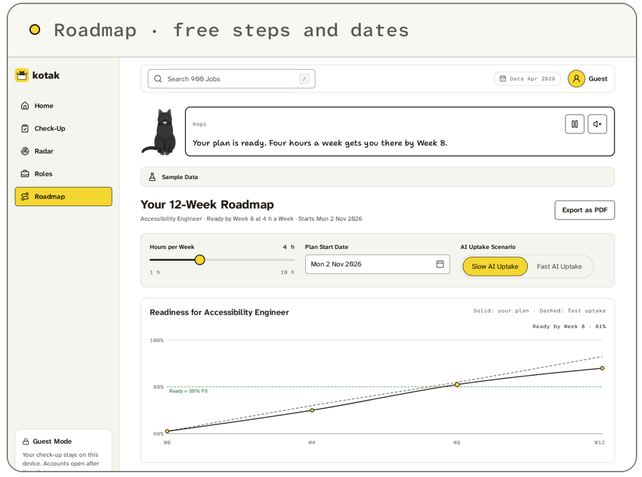

Radar + Gaps · dated verdicts

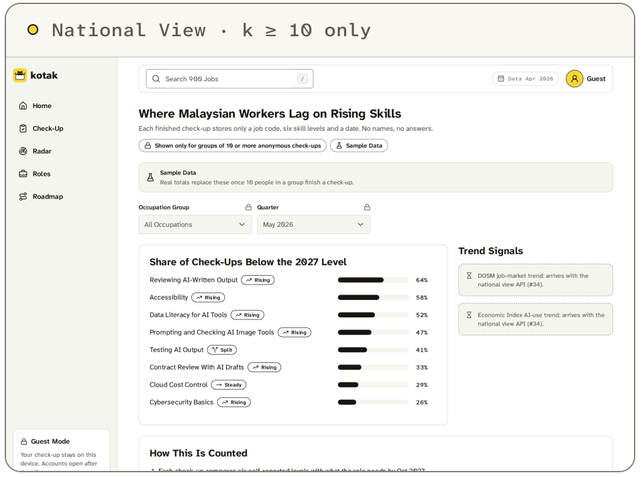

Matched Roles · fit with maths

Roadmap · free steps and dates

National View · k ≥ 10 only

13 views

PHONE + DESKTOP

Same content at 390 px and 1440 px.

WCAG 2.2 AA. Reduced motion. Guest session on this device.

Every screen carries the Sample Data label.

7. INNOVATION

Lists say what's hot.

Kotak shows what changed.

No Malaysian tool we checked joins role data to a scored gap and a timed pathway.

WHAT ALREADY EXISTS

MyMahir	Maps roles and skills. No numeric score, time estimate, scenario or SDG tag.
LinkedIn Career Explorer	Scores skills similarity. No trend, free course, scenario or SDG tag.
Closest winners	Explain a score. Neither shows more than one future or Malaysian data.

Review of public tools and comparable-winner teardowns, Oct 2026. “Closest” means PivotPath and CareerSphere.

What Kotak adds

Dated signal
Swap Apr → May; verdicts and ranking recompute in the browser.

Fixed rules
Every score has a visible formula, not a model's judgement.

A timed plan
A free step, a time estimate and a finish date, not just a gap list.

A public view
Anonymous skills gap for TalentCorp and HRD Corp, k ≥ 10.

Our claim is the mechanism, not the model.

8. IMPACT · SDG 4.4

A plan you can audit.

A baseline you can move.

SDG 4 · Quality Education · Target 4.4

“By 2030, substantially increase the number of youth and adults who have relevant skills, including technical and vocational skills, for employment, decent jobs and entrepreneurship.”

UN SDG API · official target text · accessed 22 Oct 2026

THE BASELINE · MALAYSIA, 2024

39.8%

aged 15+ with above-basic digital skills in all 5 areas

19.6%

reported writing a computer program

DOSM · UN SDG API indicator 4.4.1

CORE KPI

Sourced-roadmap rate

- Finished check-ups that reach a roadmap in under 3 minutes.
- Every verdict, fit score and milestone shows its source and date.
- Target: 100% · 0 uncited recommendations.

PRD §4 · issue #28

PHASE 2 TEST

20

seeded test profiles

100%

reach a sourced roadmap in under 3 minutes

- 0 uncited recommendations.
- 100% of hand-checked demo roles flip at least one verdict on Apr → May.

PRD §4 · issues #28, #37

WHAT WE DO NOT CLAIM

No lives-saved claim. No job-placement claim.

We measure the evidence chain: a dated plan a worker can trust enough to start.

9. TECHNICAL APPROACH

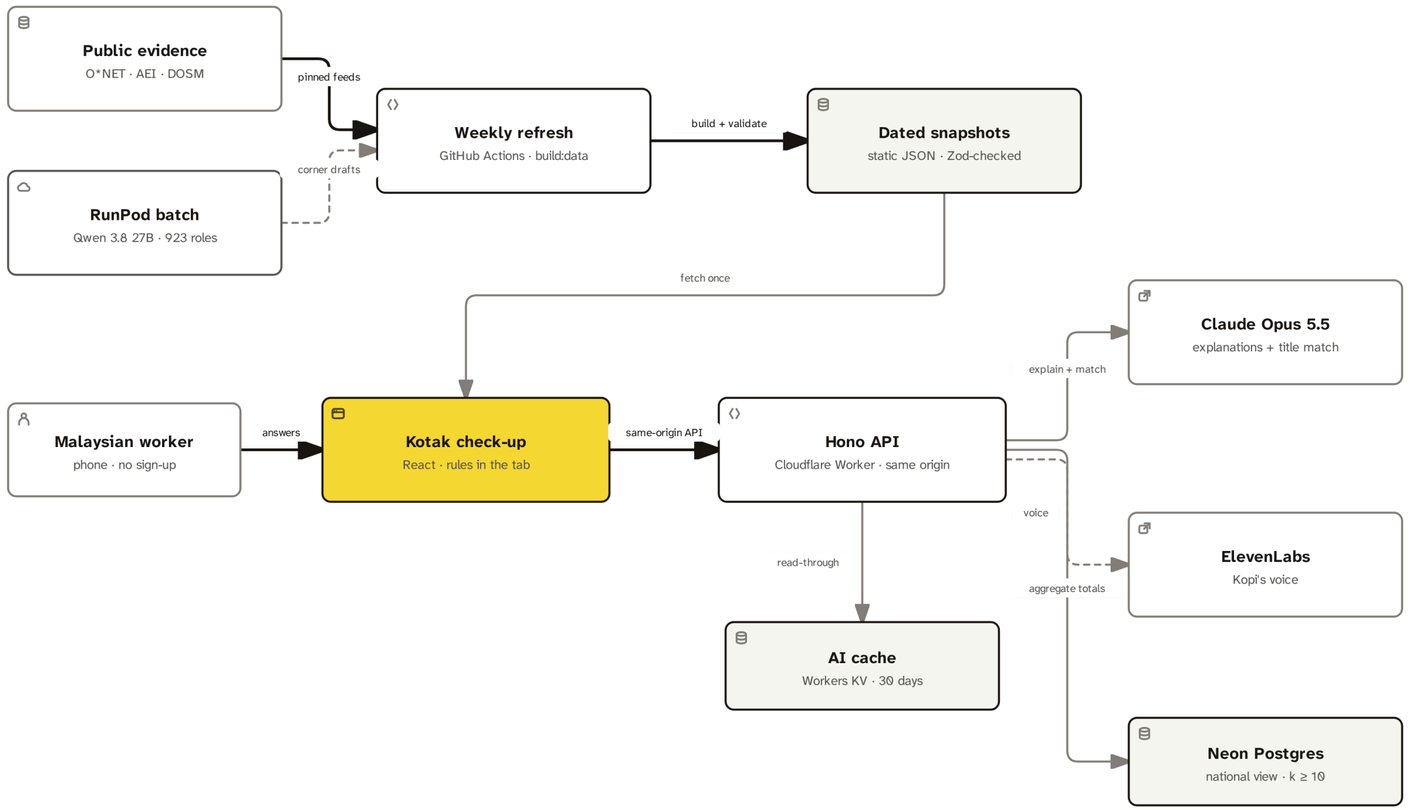

Rules in the browser. Evidence with a date.

React + Vite	Rule engine in the tab
Hono · Cloudflare Workers	One origin for app + API
Neon Postgres 18	National view, k ≥ 10
Claude Opus 5.5	Explains; never decides
ElevenLabs eleven_v4	Cached voice, text fallback
RunPod · Replit	Batch build · sponsor proof

If Claude is overloaded

Cached answer or fixed template. The verdict never changes.

Weekly GitHub Actions refresh · committed snapshots · secrets stay in repository settings.

11 components · dated snapshots · rule engine in the browser

10. WHAT WE WANT FROM YOU

Help us pressure-test the next three weeks.

The build is live. The evidence is dated. Tell us where it is weak.

01 **Who buys first: the worker, an employer, TalentCorp or HRD Corp?**
We have a public view for government and a personal plan for workers. We need the wedge.

02 **Which proof makes the roadmap credible?**
Citation coverage, 20 seeded test profiles, or one employer pilot with a named owner?

03 **What would make you not fund this?**
Name the doubt now, while we can still test it.

Data decides. AI explains.
