1. THE PROBLEM

The job is changing.
The training isn't.

For developers, testers and designers, AI tools are arriving before a clear training plan.

USE VS TRAINING

56%

of Malaysian professionals use AI at work

26% have had formal training

Hays Asia Salary Guide 2025 · via Domain 1 brief

SCALE

620,000

workers projected to be significantly affected

18% of the workforce in the sectors studied

TalentCorp Impact Study 2026

EXPOSURE

28%

of Malaysia's workforce is highly exposed to AI

World Bank & ISIS Malaysia · Sep 2025

When a company rolls out AI coding tools, which skill should its manager fund first? A course list does not answer that.

Kotak problem statement

National figures; not estimates for software workers.

2. THE USER

AI tools arrive.

What should we learn?

Sample persona: Aina, a front-end developer in Kuala Lumpur.

The company rolls out AI coding tools

Her employer pays the HRD Corp levy. Her manager asks which training to fund this year.

Aina needs a plan she can show her manager

Which skill comes first? How much time will it take?

A three-minute check-up for her job

She gets a dated plan, free steps first, and a funding route.

> Sample persona · invented for this pitch. Not a real user or a user-test result.

Developers, testers and designers first

The same engine covers 923 jobs. We start here.

data/generated/role-corners.json

3. THE SOLUTION

Leave with a plan.

Start this week.

A dated plan, weekly hours, a free link for each step and an employer funding route.

01

A Dated Plan You Can Follow

Demo answers, Web Developers: 2 Nov 2026–4 Jul 2027 · 80% fit by week 35 at 10 h/week. Rising skill first: Technical documentation. About 320 h remain after week 35.

02

A Free Link for Each Step

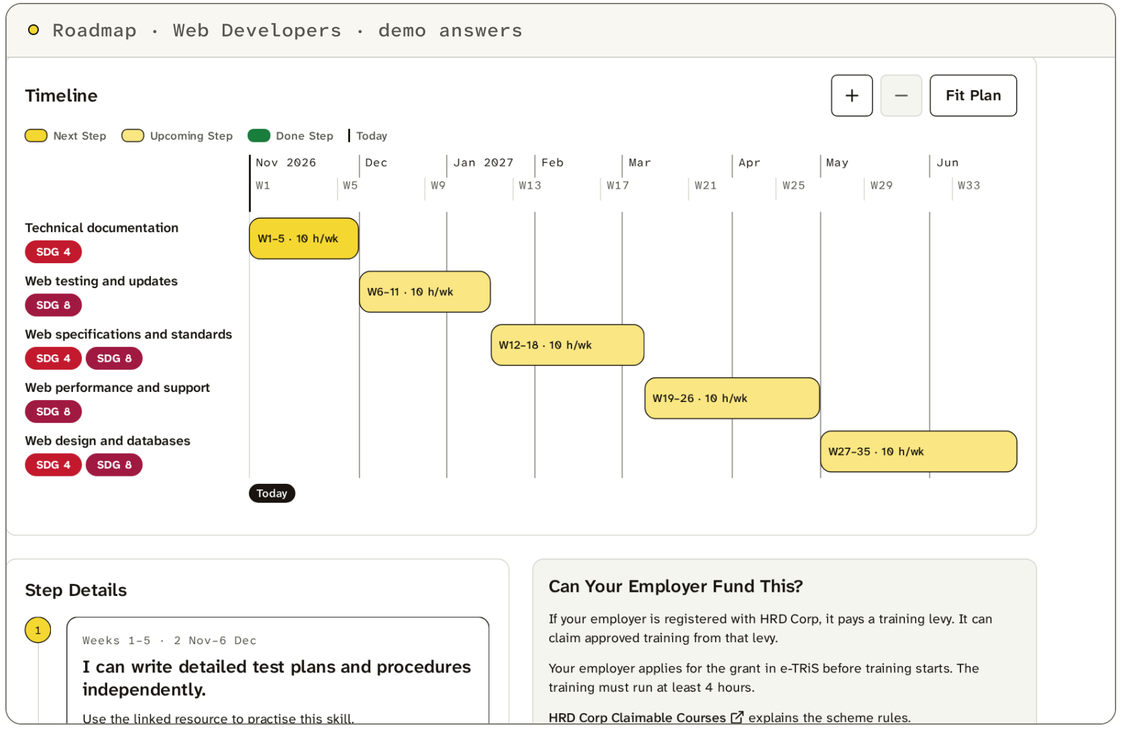

Each step links a free web search, marked “Search suggestion, not checked”. Kotak names no course it has not checked.

EMPLOYER FUNDING ROUTE

A levy-paying employer applies before training, then claims approved costs. Check the scheme before booking.

Plan: @kotak/sdk on the May 2026 snapshot · demo answers, start 2 Nov 2026. Funding: HRD Corp FAQ · 23 Oct 2026.

Profile	Dated trends	Role match
Roadmap	SDG tags	Uncertainty

4. HOW IT WORKS

Data decides.
AI explains.

Every verdict, target, fit score and roadmap order comes from fixed rules over dated snapshots.

01 · SOURCE

Dated snapshots

Anthropic Economic Index Apr/May 2026 · O*NET 30.1 · DOSM · NCES

→

02 · RULE

Fixed rules

Levels, targets, verdicts, fit scores and order

→

03 · OUTPUT

Your plan

Radar · ranked roles · roadmap to 80% fit

Draft

RunPod groups each job's tasks into six skills and drafts the questions.

Explain

Claude writes two sentences from the cited rows only.

Speak

Kopi reads its lines aloud; text and mute always available.

The browser recomputes every verdict when the snapshot changes. No model call in the loop.

THE RULE

AI never sets a verdict.

- ✓ It explains the verdict, quoting dated rows.
- ✓ A check rejects any explanation that changes it.
- ✓ If Claude fails, a fixed template answers.

Split and Unknown are valid answers. The app says so instead of guessing.

5. LIVE DEMO

Same job. New month.

The plan moves.

Load the May 2026 snapshot. The browser recomputes the radar, roles and roadmap.

April 2026 → May 2026

Technical documentation	Unknown → Rising
Web specifications and standards	Unknown → Rising
Web site building	Unknown → Declining
Three more skills	Unknown → Steady

April has one month of AI-use data, too few points for a trend, so every skill is Unknown. In May, Technical documentation moves from roadmap step 3 to step 1.

Same profile. Same 12 answers. Only the snapshot changes.

What Changed · May 2026 · Web Developers, demo answers

Kopi

New data landed. Six skills changed, and your roadmap moved with them.

What Changed When May Data Arrived

Live Demo
New data landed: May 2026 is active across Kotak.

Before (April) | After (May)

April to May Changes

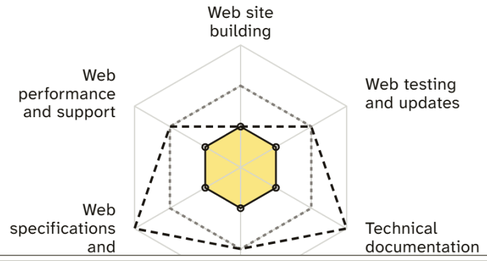

May data · Economic Index, May 2026

Web site building

Unknown → Declining

April's verdict was Unknown [1] [2] [3] [4] [5], and May's verdict is Declining because of AI [8] [9] [10] [11] [12] [13]. The estimated target moved from about 2 in April [1] [2] [3] [4] [5] to about 1.2 in May [8] [9] [10] [11] [12] [13]. The AI-use reading or its projection changed between April

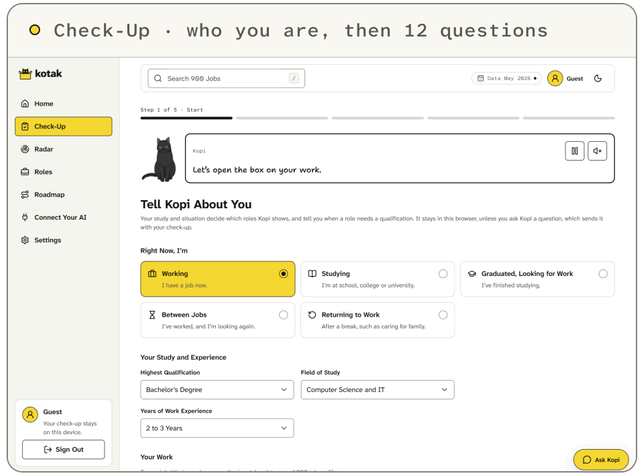

The Dashed Line Moved

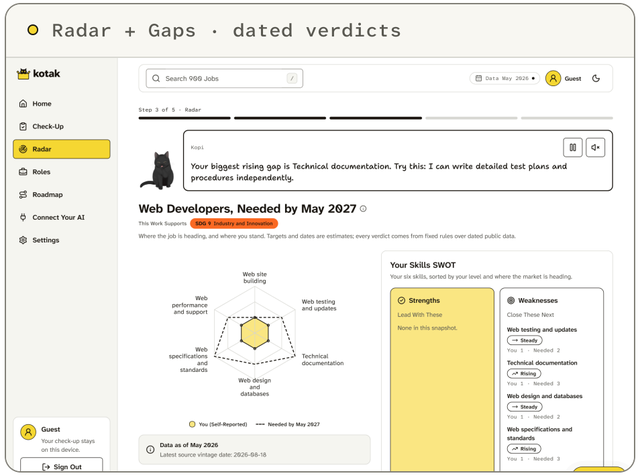

6. THE PROTOTYPE

The whole loop, on screen.

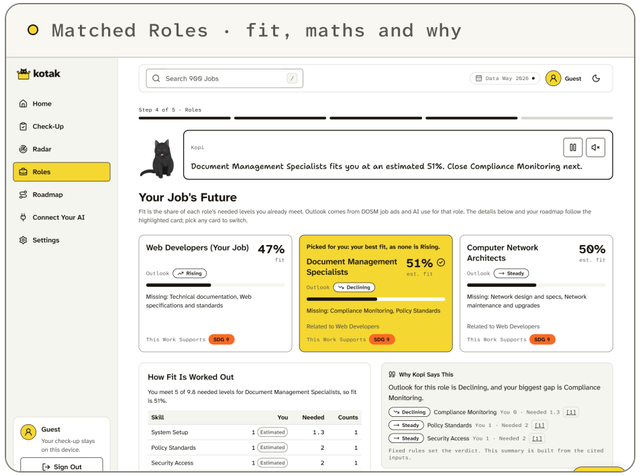

Check-Up · who you are, then 12 questions

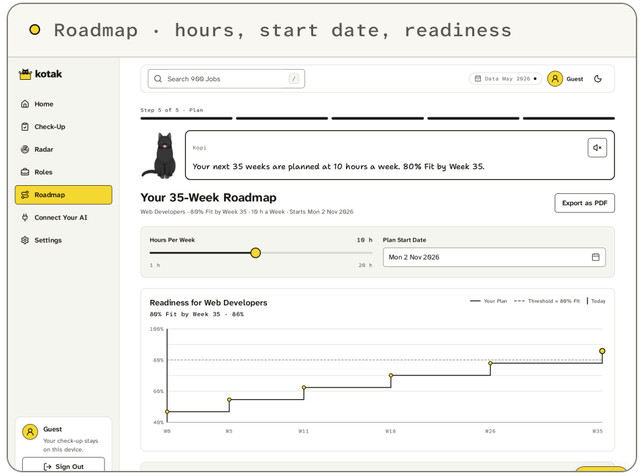

Radar + Gaps · dated verdicts

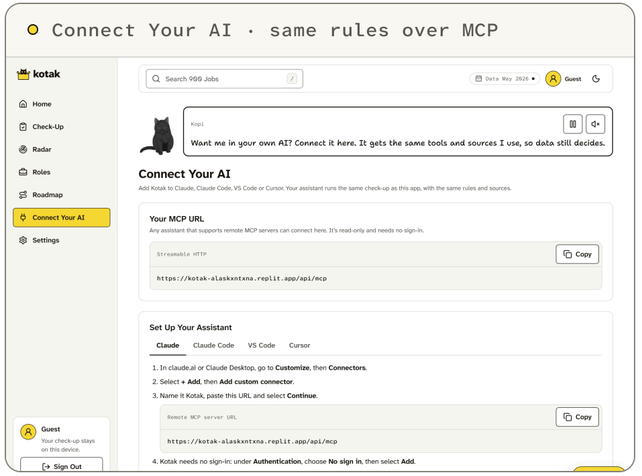

Matched Roles · fit, maths and why

Roadmap · hours, start date, readiness

Connect Your AI · same rules over MCP

PHONE + DESKTOP

Same content at 390 px and 1440 px.

WCAG 2.2 AA. Reduced motion. Guest session on this device.

Every verdict cites its dated sources.

7. INNOVATION

Courses are the supply.

Kotak sets the priority.

They offer courses. Kotak tells you which skill to learn first and why now, then points you to them.

WHAT ALREADY EXISTS

MyMahir	Maps roles and skills for Malaysia.
LinkedIn	Career Explorer compares skills across roles.
MasterClass	Subscription video courses taught by well-known experts.
ReSkills	Malaysian subscription platform for live online classes. Says it is an HRD Corp-registered training provider.
e-LATiH	HRD Corp's learning portal: free and premium courses.

Sources: MyMahir · LinkedIn Career Explorer · masterclass.com · elatih.hrdcorp.gov.my. ReSkills: NST, 2021 · reskills.com.

What Kotak adds

Dated signal
Swap Apr → May; verdicts and ranking recompute in the browser.

Fixed rules
Every score has a visible formula, not a model's judgement.

A timed plan
A free step, a time estimate and a finish date, not just a gap list.

Totals for agencies
Anonymous skill-gap totals through Kotak's API and tools; groups under 10 stay hidden. Sample rows for now.

Our claim is the mechanism, not the model.

8. IMPACT · SDG 4.4

A plan you can audit.

A baseline you can move.

SDG 4 · Quality Education · Target 4.4

“By 2030, substantially increase the number of youth and adults who have relevant skills, including technical and vocational skills, for employment, decent jobs and entrepreneurship.”

UN SDG API · official target text · accessed 22 Oct 2026

THE BASELINE · MALAYSIA, 2024

39.8%

aged 15+ with above-basic digital skills in all 5 areas

19.6%

reported writing a computer program

DOSM · UN SDG API indicator 4.4.1

CORE KPI

Sourced-roadmap rate

- Finished check-ups that reach a roadmap in under 3 minutes.
- Every verdict, fit score and milestone shows its source and date.
- Target: 100% · 0 uncited recommendations.

PRD §4

PHASE 2 TARGET

20

seeded test profiles

100%

reach a sourced roadmap in under 3 minutes

- 0 uncited recommendations.
- Met now: all 3 demo roles flip verdicts on Apr → May; the build checks it.

PRD §4 · scripts/build-data.ts

WHAT WE DO NOT CLAIM

No lives-saved claim. No job-placement claim.

We measure the evidence chain: a dated plan a worker can trust enough to start.

9. WHO PAYS

Workers use it free.

Employers pay.

The employer pays Kotak for a team view. The levy it already pays funds approved training.

ONE USER · ONE PAYER

Workers · Free	A personal check-up and a dated learning plan.
Employers · Next	Pay for a team view of skill gaps and where to spend their training levy. Not built yet.
Agencies · API	Anonymous skill-gap totals through Kotak's API and tools, for groups of 10 or more. Sample rows until real check-ups arrive.

National-view rule: apps/api/src/routes/national-view.ts. Team view: next step.

Use the Levy Already Paid

Approved Training

Registered employers pay a monthly levy of 1% of wages plus fixed allowances; 0.5% in the optional category. Apply before training and claim approved costs from it.

HRD Corp FAQ · accessed 23 Oct 2026

The Same Rules Through MCP

An employer's own HR assistant can call the same rules through MCP.

Grants

A route to explore for Kotak.

Kotak's team view and training funding are separate.

10. TECHNICAL APPROACH

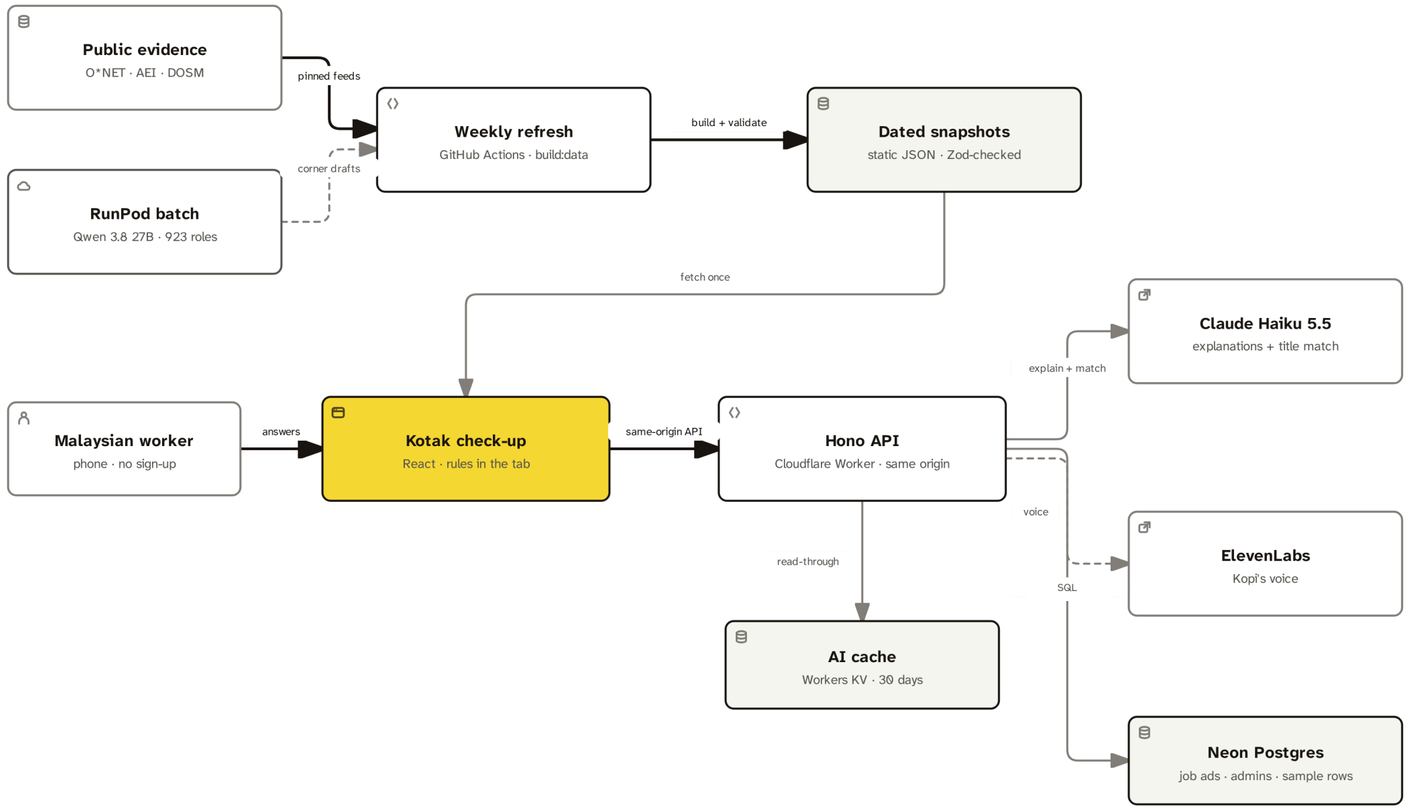

Rules in the browser. Evidence with a date.

React + Vite	Rule engine in the tab
Hono · Cloudflare Workers	One origin for app + API
Neon Postgres 18	Job ads · admins · sample rows
Claude Haiku 5.5	Explains; never decides
Live2D · ElevenLabs	Kopi animation · cached voice
RunPod · Replit	Batch build · sponsor proof

If Claude is overloaded

Cached answer or fixed template. The verdict never changes.

Sources: apps/api/src/ai/claude.ts · TECH-DECLARATION.md · TRD.md · role-corners.json.

11 components · dated snapshots · rule engine in the browser

11. TRY KOTAK

A plan for your job.

Try Kotak.

Take the check-up for your job. See the plan. Connect your own AI assistant.

01 **Open the Live Demo**

Scan the demo QR. Go from the check-up to a dated plan for your own job.

02 **Connect Your AI**

kotak-alaskxntxna.replit.app/app/connect

Copy the MCP setup. Your assistant calls the same rules as the app.

03 **Read the Code**

Scan the code QR. Trace each verdict back to its rules and dated sources.

Data decides. AI explains.
